Fluorite - Malaimbandy area, Madagascar 15.8 x 12.4 cm

Chalcocite - Telfer Mine, Australia 2.6 x 1.5 cm

Barcelona, May 31, 2018

It is said that brevity is a virtue, so I will be brief 😊

This year we will exhibit at Ste. Marie in the same place as in previous years: the entrance hall of the "Piscine" area.

Like last year we will also have a "secret cave" where there will be many more pieces. Do not hesitate to ask us about it.

We will be showing the specimens of an exceptional collection that we recently bought, we will have a Spanish novelty (still "secret") and along with this hundreds of extraordinary specimens from all over the world.

See you in Ste. Marie!

Jordi Fabre
