

FABRE MINERALS

MINERALIENTAGE MÜNCHEN
28 - 30 October

Barcelona 17/10/2011

As with every year you will find us at Mineralientage München just in front the International Mineral Pavilion where, as usual, we will have our regular booth A6-431, full of minerals.

This year we will have a large variety of new items. Unlike what is being seen in most shows lately, we have several novelties that we will offer in Munich for first time: a new find of sharp, larger and more brilliant than usual crystals of Villamaninita from its type locality, Providencia Mine, Villamanín, Spain. Also from Spain the best selection of the new box-shape Fluorites from Llamas Quarry, Asturias. And from Inner Mongolia, China, we will offer several outstanding mineralogical novelties that I'm sure will excite serious collectors.

Add to this a great suite of old Romanian specimens mined in the 1970's-1980's coming from a private collection that we just bought, and many other classic specimens from several collections as well as our usual selection of worldwide specimens. So, if you visit us we guarantee that you will find a really diversified offering.

As last year we will not send out our show mailing by snail mail, but will just use this on-line version. Times change and most of our customers now use the internet, so we believe it doesn't make much sense for us to continue consuming paper and ink, as we have the ability to offer everybody our Show mailing on-line.

We hope to meet you personally in Munich, but if you can't attend the Show we suggest you take a look at www.mineral-forum where, as usual, you will find our (more or less) daily chronicles during the show.

Mineralogical greetings,

Jordi Fabre

Villamaninita - Villamanín, SPAIN 3.7 x 2.9 cm.

Fluorite - Xianghuapu Mine, CHINA 9.2 x 8.7 cm.

Fluorite - Llamas Quarry, Asturias, SPAIN 1.5 x 1.2 cm.

Fluorapatite - Panasqueira, PORTUGAL 2.3 x 2.3 cm.

Beryl - Nyet Bruk, PAKISTAN 12.6 x 3.5 cm.

Pyromorphite - Steinbach, FRANCE 0.7 x 0.6 cm.
