

# FABRE MINERALS

## MINERALIENTAGE MÜNCHEN

26 - 28 October 2012

Barcelona 02/10/2012

It is Munich time, and this time is the time of the collections! ;-)

In the past months we have acquired three major collections: the James Catmur collection, the Claus Hedegaard collection and the Uwe Niemeyer collection, as well as several other smaller collections. Not only this, we will also have an extended selection of diversified specimens from Mongolia AR, China, new gemmy Fluorites from the Llamas Quarry, Spain, and our regular combo of worldwide quality specimens.

You can't miss us in Munich 2012 or you will miss also a lot of stupendous specimens in our booth A6.431, just in front the International Mineral Pavilion!

See you there, on our web page, or on line by our chronicles during the show in [www.mineral-forum.com](http://www.mineral-forum.com)

Mineralogical Greetings

Jordi Fabre
