Design: Fabre Minerals

Barcelona 06/13/2021

This second edition of the Ste. Marie Virtual Show completes the cycle of something that we had to create in these times of pandemic and that, in one way or another, we will continue to do after the pandemic.

It was close, but in the end Ste. Marie 2021 (real) is not going to go ahead, however here we are, digitally presenting the simile of something as wonderful as that Fair 😊

At the show, Morocco is very often the King country, and in this edition of Ste. Marie Virtual it will also be so. Up to 6 new finds and / or absolute novelties such as the 'mushroom' rubellites from Beni Bouzra or the stalactitic Malachites and Galenas with associated species from the Georges vein at Sidi Ayad. There will also be more news from other countries, which we will be publishing in the 'Core of Ste. Marie' section throughout the week of June 21-27, in which we will be offering new pieces continuously.

Do not miss the start of Ste. Marie Virtual 2021 on Monday, June 21 at 16:30 (Central European Time). You will find more than 200 new specimens and there will be another 200 pieces that we will publish gradually from June 21 to 27 (both days inclusive)

It will be a party, and although we will not physically be at the Fair we will have a very good time!

Non-stop Sainte-Marie Virtual Show, from Monday June 21th at 4:30 p.m. (Central European Time) to Sunday June 27th at fabreminerals.com

Jordi Fabre

PD: all the minerals photographed in this mailing will not be available until after the opening of the Ste. Marie Virtual Show
