Orpiment - La Libertad Mine, PERU 8,4 x 7.4 cm.

Pyromorphite - Saint Salvy, FRANCE Spec. size: 6.8 x 6.4 cm.

Barcelona 12/23/2011

It seems that 2012 could be the "Inner Mongolia's year". The different iron mines around Chifeng, Inner Mongolia A.R., are a kind of new bonanza for minerals which is changing our vision of many species like Ilvaite, Arsenopyrite, Genthelvite, Helvite, Hedenbergite, Quartz variety prase, Rhodonite... and the future is promising, as probably much more will come from this rich area.

Always attentive to novelties, we will offer several "candies" from that area, so this, together with our large stock of "classics", some other minor novelties, a new batch of specimens from the Desmond Sacco collection and a great choice of Spanish Fluorites, will complete our offering, one that you can't miss! ;-)

To help you to have still more time to see them, this year we will be open one day more than other years as we will close our room not on Friday, as past years, but on Saturday February 11. By doing so we hope to have the chance to meet some particular customers who attend Tucson only during the Main Show, and that we missed in past years when we closed on Friday.

On the other hand, please note that we will start late, Tuesday, January 31. Sorry for that but as you may know we stay almost always in our room during all of the days of the Show. We work hard there, and during the Show we periodically offer fresh & new minerals. In order to do this we cut a little bit the Show; this is the reason why we open late.

See you in Tucson or on line in our regular show's chronicle published, as usual, at: www.mineral-forum.com

Jordi Fabre

Azurite - Tsumeb, Ex Desmond Sacco 5 x 2.5 cm.

Epidote - Alaska, USA 10.3 x 9.5 cm.
