

FABRE MINERALS

Hotel TCC - Inn Suites, room 164
Monday, February 2 until
Saturday, February 14 (inclusive)

Grossular - Alpe delle Frasse, ITALY Main crystal: 0.4 × 0.3 cm

Calcite - St. Andreasberg, GERMANY Main crystal: 1.8 × 1.7 cm

Wulfenite - Mindouli, CONGO Main crystal: 1.5 × 1.1 cm

Fluorite & Fluorapatite - Panasqueira, PORTUGAL 8.7 × 5.2 cm

Barcelona 01/08/2015

The worldwide economy seems to be reasonably healthy, especially in the USA where the Euro/US\$ exchange rate is extremely favorable for Americans and we have gotten many fine specimens, as well as a major collection, the Stoppani European Carbonates Collection, plus Panasqueira, China, several more collections and, as usual, some unexpected things to offer, so it seems that Tucson 2015 could be more appealing than ever and in our room a paradise of good rocks at realistic prices! 😊

Don't miss this opportunity from Monday, February 2 to Saturday, February 14 in our room 164, Hotel TCC-Inn Suites

See you in Tucson or on line through our regular chronicles that as usual will be published at: www.mineral-forum.com

Jordi Fabre

Calcite - Kjørholt, NORWAY Main crystal: 6.3 × 4.2 cm

Quartz - Cantera Amarilla, URUGUAY 22.5 × 10.3 cm
